Avionics Post-Secondary Adult Vocational Certificate - 5299

Career Pathway: Industry, Manufacturing, Construction & Transportation (IMCT)
Location(s): Program specific courses for this program are offered at the Judson A. Samuels South Campus.

Program Description: Broward College's Aviation Institute is proud to offer a 720-hour certificate program in Avionics. It's a blended course that meets twice weekly on campus and three times a week online. On campus days will be dedicated to NIDA electronics labs, aircraft visits and projects. State-of-the-art NIDA electronics training equipment is utilized for this program. FCC General Radiotelephone Operator (GROL) license and NCATT Aircraft Electronics Technician (AET) testing is available on site. Avionics systems’ testing and troubleshooting is accomplished utilizing Boeing 727 aircraft. Avionics systems are an integral part of aircraft design and have vastly increased aircraft capability. As a result, the growing use of technology in aviation is requiring technicians to spend more time on repairing electronic systems, such as computerized controls. The course content includes, but is not limited to, troubleshooting, repair and installation of airborne radio communications, radio navigation and radar equipment systems in accordance with regulatory and industry standards. Also included is instruction in basic AM and FM transmitters/receivers and avionics equipment. Skills preparation for passing licensing/certification tests required by industry forms an integral part of the curriculum. Visit the program’s website for additional information.

Program Entrance Requirements: HS Diploma or GED
These courses are offered in 360 hour blocks and require entry approval by an Aviation Admissions Coordinator or the Associate Dean for Aviation Maintenance Programs prior to enrollment.
There are three optional entry points into this program:
1. Completion of Airframe and/or Power Plant training or Certification.
2. Electronics training to include:
   - EET1015C DC Circuits
   - CET1114C Digital Techniques
   - MTB1325 Engineering Tech. Mathematics I
   - EET1025C AC circuits
   - EET1141C Linear Techniques I
   - MBT1326 Engineering Tech. Mathematics II
   - CET1117C Microprocessors I
3. Previous Industry experience: To be evaluated by the Associate Dean for Aviation Maintenance.

Additional Program Information: Completion of the program is contingent upon student being exempt from, or passing, the Test of Adult Basic Education (TABE) in math, reading and language. The TABE test must be taken within six weeks of enrollment into the general portion of the program. These courses are offered in 400 hour blocks and require entry approval by an Aviation Admissions Coordinator or the Associate Dean for Aviation Maintenance prior to enrollment.

Program Highlights

Credit for Prior Learning: Accelerate your path to completion with these options:
- Credit by exam
- Industry Certifications
- Prior Learning Assessment
- And much more...

Related Industry Certifications: Upon completing this program, graduates will be eligible to sit for the following industry certifications/licenses:
- FCC General Radiotelephone Operator (GROL) license
- NCATT Aircraft Electronics Technician (AET) License testing is available on site.

Get an Internship: The Airport Management track includes international airport internships opportunities. Internship, in the Air Traffic Control track, are offered in conjunction with local facilities and at Ft. Lauderdale International

Median Wage and Job Growth Outlook: Broward College has Career Coach! It is designed to help you find a good career by providing the most current local data on wages, employment, job postings, and associated education and training.

Fund Your Education: This Program is Financial Aid eligible. Scholarships may be available.
