How to use the Pace Calculator:

1. Enter the total number of credit hours you have attempted to date here.

2. In the next box to the right, enter the total number of credit hours you have earned to date.

Each box defaults to ‘0’, but you can delete the zero if you wish by using the ‘Delete’ or ‘Backspace’ button on your keyboard etc.

*Please note that if calculating Pace for SAP purposes you should exclude your preparatory coursework credits as they do not count towards your SAP Pace calculation. If you are uncertain about these figures contact your academic advisor for assistance.

*The Pace required to maintain financial aid eligibility is 67%.
3. Enter the total number of credit hours you are currently taking or plan to take here.

4. Enter the total number of credit hours you anticipate earning from those being attempted here.
5. Click in the “Projected Completion Rate (aka Pace)” box and your anticipated Pace will be displayed in that box. (You can actually click anywhere outside the boxes once the figures have been entered and your projected future Pace percentage will appear.)
6. Click "Reset Calculator" button to remove figures and start a new calculation.
