

Project Overview Statement

Executive Summary

Project Title: WebCT/CID Interface for Real-time Enrollment Management
Project ID: 59
Project Leader: David Shulman
Department: Academic Affairs
Executive Sponsor: Ken Ross

PROJECT BUSINESS CASE

Project Overview

Develop an application programming interface to automate the transfer of paid student registrant data from CID to the WebCT database. Currently, this is a manual process that involves lag time between paid registration in CID and availability of records within WebCT.

NOTE: This project could potentially benefit by working with FCCSC partners IRCC and PBCC.

Business Goals

Improved delivery of e-learning services for faculty and students.

Success Factors

Automation of adding and removing of student records in the WebCT database.

Real-time transactions between WebCT and CID
