

Project Overview Statement

Executive Summary

Project Title: Develop Interface between CID and Archibus
Project ID: 156
Last Updated: March 1, 2007
Project Leader: Mark Griffin
Department: Facilities and College Services
Executive Sponsor: William Pennell

PROJECT BUSINESS CASE

Project Overview
Please develop an interface from CID which will copy employee demographics (including email address), physical inventory, and space inventory to the Archibus system. Archibus will be used as the College's work order system to replace the existing hard copy RS 1. Archibus will also generate and track preventative maintenance on physical inventory. M-Group will be contracted to assist the College in creating an interface.
Business Goals
<ul style="list-style-type: none">By creating an interface between CID and Archibus, it will eliminate the need to manually export CID data and import into Archibus. The manual process would be labor intensive and not "real time".
Success Factors
<ul style="list-style-type: none">Successful "real time" movement of data from CID to the Archibus system.
