

In order to participate in the clinical portion of any health science program, the student must complete a Medical History and Physical Examination Form. Admission into the Radiation Therapy Program is provisionally based upon acceptance of the approved health evaluation record.

Failure to submit the original form - complete with documentation - may prevent the student from progressing to the clinical portion of the program. Valid verification of immunizations is required for eligibility to attend clinicals at the health care agencies.

Students are responsible for the cost of the physical examination and any related expenses.

### Section 1: Student Self-Report of Medical History

This section about past and current health status should be completed by the student **prior** to having the physical examination.

### Section 2: Medical History and Physical Examination

The Health Care Examiner will review any documentation the student provides.

#### **Immunization Verification**

- I. A PPD and/or CXR required annually, within the past 12 months. The PPD result must be documented in millimeters of induration. If a PPD is positive, a chest x ray is required every year. QuantiFERON TB Gold Test is not accepted.
- II. A Tdap (Tetanus, Diphtheria, and Pertussis) vaccine is required within 10 years of the date of the examination.
- III. A seasonal flu vaccine is required with documentation during flu season.
- IV. Measles, Mumps, Rubella, Varicella, titers must be completed to verify immunity. Titers must be completed within 10 years of the date of the examination. All negative results necessitate a vaccination. If the Measles, Mumps, Rubella or Varicella titer is negative, two post-titer MMR or Varicella boosters are required. A student stating that they have had the disease is NOT acceptable documentation
- V. Hepatitis B titer must be completed within the past ten years. If negative, the Hepatitis series must be completed (0, 1 month, 2 months after the second dose 6 months after if using the combined Hepatitis A & B vaccine) OR the student can decline.
- VI. Results of all laboratory blood tests and diagnostics are required.
- VII. Examiner must initial after completing each section.

#### **Health Care Examiner's Statement**

This section is to be completed by a Licensed Professional Health Care Examiner (MD, DO, ARNP or PA **only**). All sections must be completed with a signature provided.

#### The following sections must be reviewed and signed by the student:

Section 3: Release of Information

Section 4: Verification of Compliance with Technical Performance Standards

Section 5: Permission to Render Medical Treatment

# Technical Performance Standards Radiation Therapy Program

The technical performance standards of the Health Science programs outline the expectations and abilities considered essential for student success relative to achieving the level of competency required for graduation. Potential students should carefully review all of the standards as detailed below.

### **Data Collection Standards**

- Tactile ability sufficient for collection and assessment of data such as pulse and temperature.
- Ability to adjust settings on equipment as needed.
- Auditory ability sufficient to monitor and assess health care needs including but not limited to hearing monitor alarms, emergency signals, ausculatory sounds, and verbal communication as when a patient/client calls for assistance.
- Visual ability sufficient for assessing and observing the patient/client and environment including near and far acuity, depth perception, visual fields, and color vision. Be able to distinguish between slightly different shades of gray.

### **Communication Standards**

- Possess sufficient communication skills to interact effectively with others verbally, non-verbally and in written form demonstrating sensitivity to individual and cultural differences.
- Ability to express self verbally in a language that will be understood by a majority of patients/clients.
- Possess ability to recognize, interpret and respond to non-verbal cues from patients and clients.

### Sensorimotor Standards

- Gross and fine motor abilities sufficient to provide safe and effective care including the ability to assist with positioning of patients.
- Standing and walking for extended periods of time and physical abilities sufficient to move from room to room, to maneuver in patient rooms and other small areas
- The motor skills of stooping, kneeling, crouching, crawling, reaching, and handling such as required to assist patient/client during a radiation therapy procedure
- Ability to perform medium work (defined as lifting 60 pound maximum with frequent lifting or carrying of objects weighing up to 30 pounds) such as required to manually move medical equipment
- Ability to walk with good balance, resist challenge while walking and support a patient/client who may have poor balance/weakened musculature during gait, ability to negotiate environmental barriers safely with patient/client
- Fine motor coordination (manual dexterity) sufficient to manipulate and use medical equipment and computers for treatment planning
- Independent mobility including transportation to/from campus and clinical courses
- Stamina to participate in physical activity over prolonged periods of time while positioning a patient/client and providing physical assistance to patients/clients.

Last Name	First Name	Date

### Intellectual and Conceptual Standards

- Ability to assimilate, within a reasonable amount of time, large amounts of complex, technical and detailed information from a variety of sources
- Ability to identify cause-effect relationship in order to make judgments and set priorities in clinical situations
- Recognize physiological changes in patient/client status and act appropriately
- Ability to function during stressful situations
- Ability to prioritize multiple tasks, integrate information and make decisions promptly

### Behavioral and Social Standards

- Possess sufficient interpersonal skills to establish meaningful and effective rapport with patients/clients, families, and colleagues from a variety of different social, emotional, economic, cultural, ethnic, religious and intellectual backgrounds as well as within all age groups
- Ability to cope with heavy workload schedule and patient demands
- Function effectively during periods of high stress
- Display adaptability
- · Accept responsibility for own behavior
- Engage in self-assessment activities which includes identification of learning needs

### Ethical Standards

- Exhibit a respect for truth and a commitment to honesty in all didactic and clinical pursuits adhere to ethical and legal guidelines established by applicable national organizations and governmental agencies
- Abide by all institutional regulations.
- Appreciate and respect patient/family confidentiality
- Information detailed on the Medical History and Physical Examination form is legally privileged and confidential. It is intended for use by the Health Science program unless written consent has been provided for release to other parties.
