Sample Questions and Information for Students

## ESL Reading Skills

The ESL Reading Skills test measures your ability to read English. Specifically, it assesses your comprehension of short passages. It contains brief passages of 50 words or less and moderate length passages of 50 to 90 words. Half of this test contains straightforward comprehension items (paraphrase, locating information, vocabulary on a phrase level, and pronoun reference). The other half assesses inference skills (main idea, fact versus opinion, cause/effect logic, identifying irrelevant information, author's point of view and applying the author's logic to another situation).

## ESL Listening

The ESL Listening test was developed to differentiate between different ESL levels ranging from novice-mid to advanced-high, according to the California TESOL descriptors. ESL Listening is a direct measure of the listening skills of non-native English speaking students. The test measures the ability to listen to and understand one or more people speaking in English. The conversations take place in academic environments such as lecture halls, study sessions, a computer lab, the library, and the gymnasium; and in everyday environments such as at home, shopping, at a restaurant, at a dentist's office, listening to the radio, reading the newspaper, and performing tasks at work.

While looking at pictures of the speakers, the student listens to a conversation or lecture. The question is then read followed by the four answer choices. Students can click on the appropriate Play button to replay the conversation, the question, or any of the answer choices. Each of these can be heard only two more times after the initial reading.

There are two content areas: Literal Comprehension and Implied Meaning

ESL Listening Content Areas
