

# Enabling Turnitin Clarity in D2L Brightspace (New) Content Experience

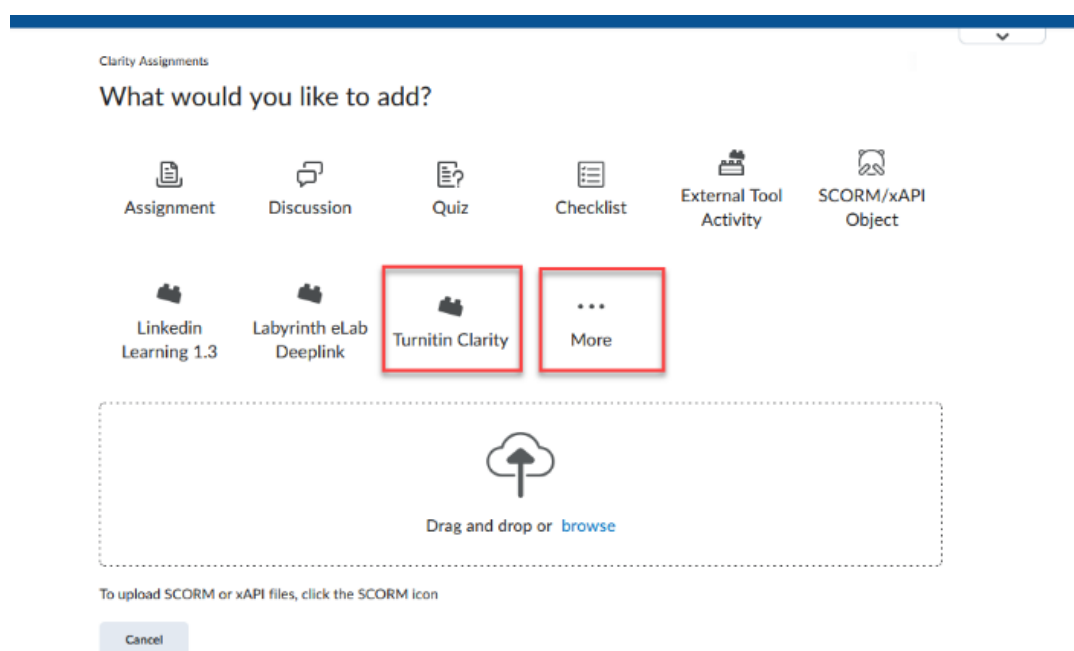

## Setting up and managing Turnitin Clarity

Unlike standard Turnitin assignments, **Turnitin Clarity** is **not** available from the **Assignments** tool. Instead, it must be added through a **Content** module.

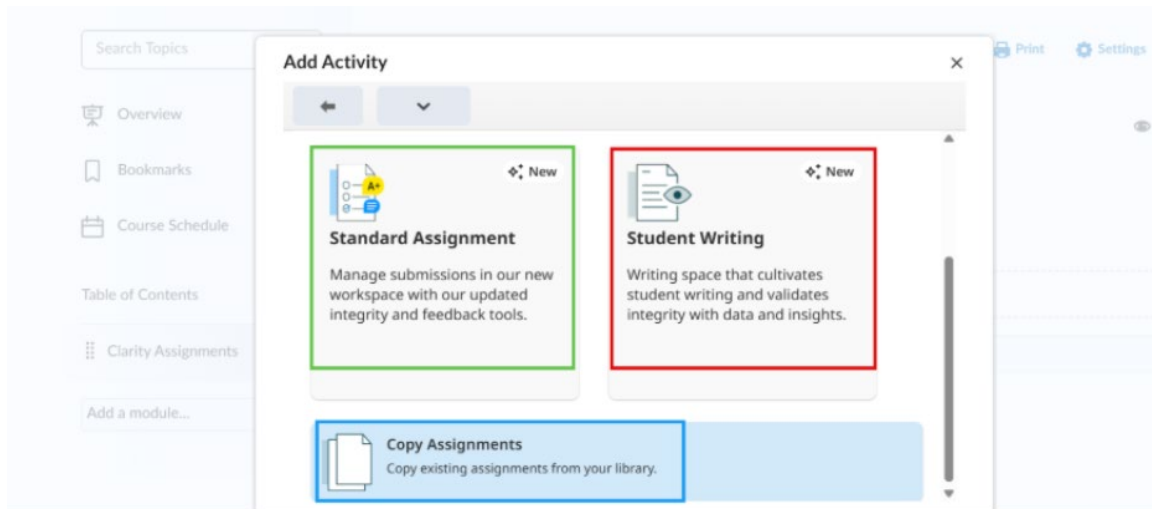

1. In **D2L (New) Content Experience**, click **Content** from the blue navigation bar.
2. Create a new module or open an existing module. (can be named based on instructor preferences)
3. Click on **Add Existing**.

4. From the icons, select Turnitin Clarity or More... to search for Clarity icon if not visible.

5. Configure the assignment settings based on your preferences.

6. Choose one of the following assignment types:

- a. **Standard Turnitin Assignment** – Includes Similarity and AI Writing reports. This assignment type is also available through the **Assignments** tool.
- b. **Student Writing Space** – Available only through **Turnitin Clarity LTI within the Module**. This option provides instructors with additional insights into the student's writing process, including a version of history and writing activity.

7. You can also copy Turnitin Clarity assignments from previous course offerings to reuse them in a new course. You may see a prompt to customize AI Chat.
